The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Weimer et al.

(Weimer). Note canister 15; boom 8, 9; cradle 5a; and winch 1.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weimer.

Regarding claims 2 and 10, level winding winch systems are commonly known and it would have been obvious to one of ordinary skill in the art to have used such as Weimer's winch if such were readily available to the ordinarily skilled artisan.

Concerning claims 3-9 and 11-13 the examiner takes official notice the recited elements and their peripherals are commonly known elements used on airplane towed systems for their inherent purposes. It would have been obvious to one of ordinary skill in the art to have used such on Weimer's device for their inherent purposes.

Bartov, Wright, Opdahl, Costantino et al., and Hainsworth et al. have been cited for interest because they disclose similar devices.

Any inquiry concerning this communication should be directed to Mark S. Graham at telephone number 703-308-1355.
